TOAN BAN LE

JAVA DEVELOPER

0393146946 letoanban.word@gmail.com Thu Duc City, Ho Chi Minh City

SUMMARY

Final-year IT student focused on Frontend Development, experienced in building scalable web applications with React.js and Next.js, integrating APIs, and implementing real-time interactive features.

EDUCATION

HUTECH UNIVERSITY 2022 - 2026

Information Technology

GPA: 3.40/4.00

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript
Backend Development: Spring Boot, NodeJS (Express, Nest), RESTful API, JWT Authentication
Databases & Storage: MySQL, MongoDB, Redis, MinIO (Object Storage).
Frontend Development: NextJS, ReactJS, HTML, CSS, Bootstrap5
Tools & Platforms: Docker, Git, Postman, Socket.IO, Stripe API.

PROJECTS

Social Media Website - Personal Project -

GitHub Link: https://github.com/ToanBan/SocialMediaWebsite

- Built a social media platform with features including post creation, commenting, search, user following, and real-time messaging
- Designed and developed RESTful APIs for core modules: User, Post, Comment, and Follow
- Implemented JWT-based authentication and role-based access control (USER, ADMIN) using Spring Security
- Integrated OAuth2 (Google Login) for seamless user authentication
- Developed real-time chat and commenting functionality using WebSocket
- Improved system performance using Redis caching, reducing database load
- Managed media storage (images/videos) using MinIO (object storage) with support for large file uploads
- Designed relational database schema with MySQL and optimized queries using JPA/Hibernate
- Containerized the application using Docker for easier deployment and scalability
- Built frontend using React.js (TypeScript) and integrated with backend APIs

Technologies: Java, Spring Boot, Spring Security, JPA/Hibernate, MySQL, Redis, WebSocket, MinIO, Docker, React.js (TypeScript)

SnapMartWebsite - Personal Project -

GitHub Link: https://github.com/ToanBan/SnapMartWebsite

- Built a full-stack platform combining social networking and e-commerce features (posting, commenting, search, product management, payments)
- Designed and developed RESTful APIs with JWT Authentication and OAuth2 (Google Login)
- Implemented real-time chat and file sharing using Socket.IO
- Developed search functionality for users and products with optimized queries
- Integrated Stripe API for secure payment processing and order management
- Improved performance using Redis caching, reducing database load
- Built a content-based recommendation system using Python and Redis Vector Search for personalized suggestions
- Developed frontend using Next.js with infinite scrolling and API integration

Technologies: Node.js (Express), Next.js, TypeScript, Python, MySQL, Redis, Socket.IO, JWT, Stripe API.
